

CE marked

The **MiniOne System** is a tool for analyzing DNA, but it's more than just biology. The mechanics of DNA separation are a physical and chemical process as well. Although conceptually simple, electrophoresis technology draws insights from many fields of science and engineering. While students engage with real time DNA analysis, educators can use the MiniOne System's engineering to illustrate crosscutting concepts from physics, chemistry, and math!

CE marked

MiniOne PCR System

Fast, Intuitive, and Accessible

DNA amplified and ready to run in 45 minutes

MiniOne Electrophoresis System

Safe, Engaging, and Reliable

Teach an electrophoresis lab in 45 minutes

CE marked

Hands-on MiniLab Kits

Convenient, Ready-to-use, and Affordable

PCR & Gel Electrophoresis

Color Dye

DNA Fingerprinting

A Taste of Genetics

PTC Genetics

Candy Color

CSI Forensics

DNA Detectives
